

Dipanjan Chakraborty

Senior Android Engineer & Group Lead

11.6+ Years Experience · Banking · Retail · Sports Tech | +91 89024 57437 | chakraborty.dipanjan07@gmail.com | linkedin.com/in/dipanjanachakraborty-b4b15a7a | Kolkata, India

PROFESSIONAL SUMMARY

Senior Android Engineer with 11.6+ years designing, developing, and maintaining scalable apps in Kotlin and Java, architecting multiple applications on MVVM (LiveData, Lifecycle, ViewModel, Flow) across - the Wimbledon 2026 tournament app, Nationwide Building Society's UK banking platform, the Tata Neu super-app (10M+ users), and Safeway/Albertsons (~11M monthly downloads). Deep, hands-on expertise in Kotlin, Jetpack Compose, RoomDB, WorkManager, and Kotlin Coroutines and Clean/Modular Architecture, with a track record of owning systems end-to-end — authoring Architecture Decision Records, driving performance work (Baseline Profiles, R8, cold-start and memory optimisation), and hardening financial-grade security (Certificate Pinning, Android Keystore, OAuth 2.0 / JWT).

Pairs individual technical depth with engineering leadership — mentoring developers, running architecture reviews, and cutting development cycle time ~30% through AI-assisted workflows (Claude Code, GitHub Copilot, Cursor). Owns the full software development life cycle (SDLC) within Agile/Scrum teams, equally effectively driving ambiguous, high-scale problems independently or across iOS, backend, and product teams.

Actively building cross-platform depth via Kotlin Multiplatform / Compose Multiplatform, with a growing interest in Android Automotive as an emerging area of the platform.

CORE COMPETENCIES

- Android Platform Engineering & Native Android App Development
- App Startup & Memory Optimisation
- Unit Testing & Test Automation Framework
- Product Lifecycle Delivery (SDLC)
- Scalable & Modular Architecture
- Engineering Leadership & Mentorship
- Stakeholder Management
- AI-Assisted Development
- Mobile Performance Optimisation
- CI/CD & Release Management
- Secure API & Mobile Security
- Agile / Scrum Methodology
- Version Control (Git)
- Kotlin Multiplatform & Cross-Platform Architecture (growing focus)
- Android Automotive (emerging interest)

TECHNICAL SKILLS

Languages & Platforms: Kotlin · Java (Legacy/Migration) · Android Native Application Development

UI/UX: Compose UI, Custom Views, Material Design, Accessibility, Adaptive UI, Data Binding, View Binding, ConstraintLayout, AndroidX, XML UI

Jetpack: ViewModel, LiveData, Navigation Component, WorkManager, Paging 3, RoomDB, DataStore

Async: Kotlin Coroutines (structured concurrency), Flow

Architecture: MVVM, MVI, MVP, Clean Architecture, Repository Pattern, Unidirectional Data Flow, Modular Architecture, SOLID, TDD | DI: Dagger2, Hilt

Networking & Security: REST APIs (Retrofit + OkHttp), GraphQL, Moshi/Gson/kotlinx.serialization, Certificate Pinning, Encrypted SharedPreferences, Android Keystore, OAuth 2.0 / JWT / SSL

Testing & Quality: Unit Testing (JUnit, Mockito, Truth), UI/Instrumentation Testing (Espresso, Robolectric), SonarQube, Lint, Spotless

Data Structures & Algorithms: Applied to performance-critical, memory-constrained mobile solutions

Analytics & Crash: Firebase Analytics, Adobe Analytics, Firebase Crashlytics, ANR Analysis, Logcat Profiling

CI/CD & Cloud: Jenkins, GitHub Actions, GitLab CI, Bitrise, Gradle (modularization, KSP, R8/ProGuard, config cache), App Signing, Firebase (FCM, Auth, Remote Config), Google Cloud Platform (GCP)

Tools & AI: Git/GitHub/GitLab/Bitbucket, JIRA, Confluence, Figma, Zeplin, GitHub Copilot, Claude Code, Cursor, Codex, ChatGPT, Gemini

IoT / Cross-Platform: BLE, RFID, NFC (Contactless Payments) · Flutter & Dart (working familiarity) · Kotlin Multiplatform (KMM) / Compose Multiplatform (working familiarity) · Android Automotive (interest / self-directed exploration)

WORK EXPERIENCE

Lead Android Developer

09/2022 – Present

IBM India Pvt. Ltd. | Kolkata, India

- Architected and delivered scalable Android solutions for the Wimbledon 2026 mobile platform using Kotlin, Jetpack Compose, and Clean Architecture, built to serve millions of users globally during live tournament traffic.
- Engineered secure digital banking features for Nationwide Building Society (UK), implementing Certificate Pinning, Encrypted SharedPreferences, Android Keystore, and OAuth 2.0 / JWT — meeting financial-grade mobile security requirements.
- Adopted Modular Android Architecture with Gradle build optimisations (KSP, configuration cache), reducing build times and enabling faster release cycles; authored Architecture Decision Records (ADRs) to align engineering patterns across teams.
- Accelerated development velocity by ~30% by integrating AI-assisted workflows (GitHub Copilot, Claude Code, Cursor, Codex, Gemini) into daily development, automated code review, and test generation.
- Mentored a team of 3–5 junior and mid-level Android developers through regular code reviews and architecture sessions.
- Drove CI/CD pipeline improvements using Jenkins and GitHub Actions, enabling automated test execution and staged Play Store deployments.
- Owned end-to-end app performance — Baseline Profiles and Logcat profiling — to resolve cold-start regressions, ANRs, and memory leaks across the Wimbledon and Nationwide platforms.
- Collaborated with iOS engineers, backend teams, and external integrators to deliver consistent cross-platform experiences for banking and sports platforms.
- Award: Client Appreciation Star of the Sprint — for consistently exceeding delivery milestones on critical banking and sports platform features.

Senior Android Developer (Group Lead)

05/2018 – 09/2022

Tata Consultancy Services Ltd. | Kolkata, India & Stockholm, Sweden

- Led Android engineering for the Tata Neu Super App (Tata Digital), integrating 15+ Tata brands serving 10M+ users across grocery, electronics, finance, and travel.
- Designed a microservices-backed Modular Android Architecture using MVVM + Clean Architecture, improving scalability and reducing module coupling.
- Managed a team of 5–7 Android developers, driving Agile sprint execution, code reviews, and architecture design discussions.
- On-site at Ericsson HQ, Stockholm — developed a BLE-based proximity detection app for IoT asset tracking.
- Integrated REST APIs enabling cross-brand NeuCoins rewards redemption and multi-service payment flows.
- Partnered with product and UX teams to deliver high-performance retail and digital commerce experiences aligned with business KPIs.
- Award: Certificate of Appreciation — for outstanding technical delivery and engineering leadership across multiple high-impact product launches.

Android Developer

10/2014 – 04/2018

Indus Net Technologies Pvt. Ltd. | Kolkata, India

- Built and shipped Appystore, an Android learning platform for children (ages 0–8), recognised by Google Play as 'Best App for Kids' (2017).
- Developed and deployed 10+ Android applications across Retail, Media, and Enterprise domains to Google Play Store and Amazon App Store.
- Improved app startup time and reduced memory footprint through profiling and memory optimisation techniques.
- Collaborated with UI/UX designers using Figma and Zeplin to deliver pixel-perfect, accessibility-compliant interfaces.
- Participated in the full Agile lifecycle — sprint planning, estimation, UAT coordination, and release management.

- Award: WalkOverWalls (WOW!) Award — for consistent delivery excellence, problem-solving, and technical innovation.

KEY PROJECTS

Wimbledon Official App — IBM India • Current

Official app of The Championships, Wimbledon — real-time match scores, live player stats, court schedules, and tournament updates for a global audience. Built with Kotlin, Jetpack Compose, and a modular platform architecture, with a focus on performance and low-latency delivery. Play Store: play.google.com/store/apps/details?id=com.ibm.events.android.wimbledon

Nationwide Building Society App — IBM India • Nationwide Building Society (UK)

Secure UK banking app rated 4.7★ on Google Play — biometric login, pass number authentication, account management, payments, and transaction tracking. Implemented Certificate Pinning and Encrypted Shared Preferences, and contributed to NFC-enabled contactless payment flows meeting UK banking compliance standards. Play Store: play.google.com/store/apps/details?id=co.uk.Nationwide.Mobile

Safeway Deals & Delivery — IBM India • Albertsons Companies Inc.

US grocery retail super-app covering fresh produce, pharmacy, and wellness, with in-store, pickup, and delivery options — personalised shopping, aisle navigation, digital coupons, rewards, and meal planning. ~11M monthly downloads. Play Store: play.google.com/store/apps/details?id=com.safeway.client.android.safeway

Tata Neu Super App — Tata Consultancy Services • Tata Digital

Unified digital platform integrating 15+ Tata brands across grocery, electronics, finance, and travel, serving 10M+ users, with a NeuCoins rewards ecosystem spanning online and offline channels. Brands include bigbasket, Croma, Tata CLiQ, Air India, IHCL, and Westside. Designed a Modular Android Architecture (MVVM + Clean Architecture) backed by microservices REST APIs. Play Store: play.google.com/store/apps/details?id=com.tatadigital.tcp

Athlepic — Indus Net Technologies

Sports and fitness platform connecting athletes and fitness enthusiasts — athlete profiles, event discovery, performance tracking, and community engagement. Published on Google Play Store.

Appystore — Google Play 'Best App for Kids' 2017 — Indus Net Technologies

Learning app for children up to age 8 — rhymes, phonics, reading, stories, science, and math across 5,000+ curated videos in 18 learning areas. Recognised by Google Play as 'Best App for Kids' (Dec 2017); surpassed 200K+ downloads at a 4.5★ rating. Note: app was subsequently unpublished from the Play Store in 2019.

BLE Proximity Detection — Tata Consultancy Services • Ericsson HQ, Stockholm

Enterprise IoT application to locate lost Bluetooth-enabled devices via BLE advertisement signal tracking, triangulating BLE signals to guide users to a device's location in real time. Delivered on-site at Ericsson HQ, Stockholm.

ACHIEVEMENTS & AWARDS

- Client Appreciation Star of the Sprint — IBM India Pvt. Ltd. — for exceeding delivery milestones on critical banking and sports platform features.
- Certificate of Appreciation — Tata Consultancy Services — for outstanding technical delivery and engineering leadership across high-impact launches.
- WalkOverWalls (WOW!) Award — Indus Net Technologies — for consistent delivery excellence, problem-solving, and technical innovation.
- Best App for Kids, Google Play 2017 — Indus Net Technologies — Appystore, recognised by Google Play, serving 200K+ users.

EDUCATION

B.Tech — Computer Science & Engineering | 2010 - 2014

West Bengal University of Technology (WBUT), Kolkata

Higher Secondary Education — Science | 2008 - 2010

West Bengal Council of Higher Secondary Education (WBCHSE), Kolkata

Secondary Education | 2008

West Bengal Board of Secondary Education (WBBSE), Kolkata

CERTIFICATIONS & LICENCES

- IBM Generative AI Developer — IBM • 2025

- Android Enterprise Certified Associate — Android Enterprise Academy · 2024
- IBM Enterprise Design Thinking Practitioner — IBM · 2024
- Samsung Knox Associate — Samsung Electronics, Mobile Experience Business · 2023
- Samsung Galaxy Business Associate — Samsung Electronics, Mobile Experience Business · 2023
